Healthcare IT

Imaging Solutions' Healthcare IT products are designed to provide healthcare professionals with reliable and efficient solutions for their medical computing needs. Our product range includes dictation microphones, computers, mice, keyboards, and other accessories that are specifically designed for use in medical applications and environments.

Disc Publishers

Virtua® XR - Medical Disc Publisher

Overview

The Codonics Virtua XR Medical Disc Publisher records up to 62 CDs or 31 DVDs an hour. Virtua keeps up with multi-modality environments, and is specifically designed for high-volume imaging applications such as breast MR, PET/CT, MRA and CTA where imaging systems send tens of thousands of images an hour. Customized discs are recorded, labeled and ready to leave with the patient without workflow interruption.

The XR's compact design features an advanced processor for receiving and managing studies, a robotic disc recorder and printer, and a user-friendly touch screen interface. The built-in printer produces brilliant, full-color disc labels that include patient demographics and the facility's address and logo for marketing. Use your own custom labels or use our complimentary label design service.

Features / Benefits

- Automatically records patient studies without tying up your workstation or employee resources
- On-demand disc creation and labeling directly from modality workstations
- Studies can be conveniently viewed from disc on a workstation using one or more DICOM viewers, specialized viewers and / or custom OEM viewers*
- HL7 and DICOM Structured Reports can be received and matched to a patient's study allowing the recording of both the report and study together on the same disc**
- Intuitive touchscreen turns novices into experts in minutes
- User interface is available in multiple languages
- Scheduled Archive automatically records all studies to disc for backup/disaster recovery. It also records a complete history of all archive activities on each disc**
- Compact design allows for easy siting
- Meets industry standards including DICOM part 10, IHE PDI, and audit logs for HIPAA compliance

*not all viewers are standard   **optional features

Specifications

Media Inputs:	Two 50-disc input bins
Media Output:	One 25-disc output bin
Optical Drives:	Two CD/DVD drives
Recordable Formats:	CD-R, DVD-R
Label Print Technology:	Inkjet
Print Resolution:	Up to 4800 dpi
Ink Cartridge:	One tri-color cartridge
User Interface:	Integrated/detachable 15" LCD touch screen and remote web browser access
Performance:***	Up to 62 CDs per hour, 31 DVDs per hour
Data Storage:	190 GB
Interface:	10/100 Base-T / Gigabit Ethernet (RJ-45)
Network Protocols:	DICOM Store SCP (up to 24 simultaneous connections) DICOM query/retrieve (optional) HTTP Web Server (for remote control and configuration)
Smart Drive:	USB flash drive for storing configuration data
Power:	Universal Input: 100-240VAC, 50/60 Hz, 300 VA (rated power)
Dimensions:	26.7 " (67.8 cm) H, 19.2" (48.6 cm) W, 26.7 " (67.8 cm) L
Weight:	60 lbs. (28kg.)
Regulatory:	Full medical device compliance including Class 1 FDA and Class I MDR 2017/745/EU (CE), GMP/QSR, ISO 13485:2016/NS-EN ISO 13485:2016, Electrical Safety IEC 60601-1 Ed. 3.1 and EMC/EMI: FCC Class B and IEC 60601-1-2: Ed. 4 for Professional Healthcare Facilities

IMAGING Solutions

Virtua® E - Medical Disc Publisher

Overview

Virtua E is the perfect, economical, easy to use, image distribution accessory for any modality. Its compact design features a table-top touch screen, an advanced processor for receiving and managing studies, a robotic disc recorder and printer, and a user-friendly interface. The built-in printer produces brilliant, full-color disc labels that include patient demographics and the facility's address and logo for marketing. Customers can create their own custom labels or use Codonics disc label design service offered exclusively to our customers.

Features / Benefits

- Automatically records and labels patient studies without tying up your workstation or employee resources
- Studies can be conveniently viewed from disc on a workstation using one or more DICOM viewers, specialized viewers and/ or custom OEM viewers*
- HL7 and DICOM Structured Reports can be received and matched to a patient's study allowing the recording of both the report and study together on the same disc**
- Narrated messages provide complete system status at the touch of a button
- Intuitive touchscreen turns novices into experts in minutes
- User interface is available in multiple languages
- Scheduled Archive automatically records all studies to disc for backup/disaster recovery. It also records a complete history of all archive activities on each disc**
- Ultra compact design allows for easy siting
- eets industry standards including DICOM part 10, IHE PDI, and audit logs for HIPAA compliance

Magenta	COD-1VCX-MR833-4
Yellow	COD-1VCX-YR833-4
Black	COD-1VCX-WR833-4

Replacement Print Head

Replaceable Print Head for the Virtua-XR. Regular replacement of the print head will be necessary approximately every 10,000 prints.

Replacement Print Head	PRM-FAR53471

Film and Paper Printers

Horizon® G1 - Multi-media Imager

Overview

The Horizon G1 is an intelligent, desktop dry imager that produces diagnostic quality medical films plus grayscale paper prints if you choose the optional paper feature.

The imager is compatible with many industry standard protocols including DICOM and Windows network printing. Horizon also features direct modality connection, with up to 24 simultaneous DICOM connections. High speed image processing, networking and spooling are standard.
Horizon® G2 - Multi-media Imager

Overview

The Horizon G2 is an intelligent, desktop dry imager that produces diagnostic quality medical films plus grayscale paper prints if you choose the optional paper feature. The imager is compatible with many industry standard protocols including DICOM and Windows network printing. Horizon also features direct modality connection, with up to 24 simultaneous DICOM connections. High speed image processing, networking and spooling are standard.

Horizon® GS - Multi-media Imager

Overview

The Horizon GS combines diagnostic film and grayscale paper printing to provide the world's most versatile medical grayscale imager. Horizon's multiple media options help to immediately cut your costs, build referring physician loyalty and attract new business.

Featuring low-cost, room light viewable grayscale paper and a compact, counter-top design, Horizon obsoletes film-only imagers. High speed image processing, networking and spooling are all standard.

Printer Accessories and Consumables

Imaging Solutions supply a comprehensive range of quality accessories and consumables as well as additional options for certain product models. Our range of accessories and consumables include superior quality film and paper, CDs and DVDs, ink cartridges, markers, cases and sleeves.
DirectVista® Diagnostic Blue and Clear Film

Codonics patented imaging technology outputs superior diagnostic dry film with an unmatched image quality. The film is the ideal solution for the most demanding medical hardcopy applications. Completely eliminating space between lines by advancing the film in a smooth motion, the diagnostic output is precise and consistent. Codonics film is available in 14"x 17",11"x14" and 8"x 10", giving the user the option to scale the image to the appropriate film size, providing an alternative to print at a lower cost. Plus, our exclusive 14"x 36" and 14" x 51" long film provides specialized orthopaedics with "digitally stitched" true-size images for long bone and scoliosis studies on one continuous film.

Film — Competition

Film — Codonics

In thousands of side by side comparisons, board certified radiologists could not tell the difference between images printed on Codonics imagers from those printed on more expensive laser imagers. Codonics' patented imaging technology outputs diagnostic film and paper achieving unmatched versatility and image quality.

Dynamic Media Transport System (DMTS) allows Codonics imagers to print while the media advances in a smooth motion eliminating space between lines.

Slim LED Weiko Viewers

80,000 Hours Without Maintenance

Using the latest LED technology, Weiko viewers offer a flicker free, uniform light across the screen reducing eye fatigue. Viewers are available as single, double or four way wall mounted panels. Single viewers can be purchased as desk mounted units.

Economic Advantages

The Weiko requires less electricity, meeting EU regulations regarding the reduction of energy consumption. It has a lamp life of 50,000 hours vastly reducing maintenance expenditure.

Operative advantages

The Weiko emits a light more suitable to read x-ray film. The elimination of flickering reduces radiologist eye fatigue. A more uniformed lighting diffusion is achieved with a 3500 cd/mq luminance.

Features

- Super energy efficient
- Reduces eye fatigue
- 80,000 hours without maintenance
- Super slim at 3 cm (9 cm less than standard models)
- Integrated film grip
- Chassis manufactured in anti-scratch anodized aluminium

- Film Automatic Switching, automatic switching on/off, at the positioning/removal of the film
- Dimmer: luminance adjustment with range from 30% - 100%
- Vibrations and shock resistance, due to the use of "solid state" components
- Eco friendly, all components have a limited environmental impact

IMAGING Solutions
Wall Assembling Slim Viewers

The innovative special lighting system of the panels lets to obtain the following advantages, both in wall assembling and desktop versions.

Operative Advantages:
- Type of light more suitable to read X-Ray films (temperature of colour: about 7200°K)

- Elimination of light flickering to reduce the radiologist eyes fatigue

- Luminance of 3500 cd/mq with more uniform lighting diffusion

Economic Advantages:
- Lamps' life of about 50.000 hours! (elimination of the maintenance expenses)

- Reduction of electrical power used, it meets the U.E. Directive as regards the reduction of energy consumption

Desktop dictation goes mobile

With patented lossless speech technology

The SpeechMike Premium has reached its highest stage of evolution. Benefit from all advantages of the industry leading dictation microphone, without the constraints of a cable. Record your voice using a premium decoupled studioquality microphone with a built-in noise reduction filter and achieve exceptional speech recognition results. Thanks to the revolutionary patented lossless speech technology, the SpeechMike Premium Air offers maximum mobility without any compromises. The device achieves the same high speech recognition performance as the standard SpeechMike Premium with a cable.

Exceptional recording results
- Studio-quality microphone for best-in-class speech recognition results
- Decoupled free-floating microphone for precise recordings without background noise
- Integrated motion sensor mutes microphone when not in use

Wireless for maximum mobility
- Patented 100% lossless speech technology for smooth wireless voice recording
- Superior docking station for high-speed wireless charging and smart pairing
- Long-lasting battery for up to 24 hours of reliable recording time

Designed for convenience
- Freely configurable buttons and modes for a personalized device
- Wear-free slide switch and push buttons for comfortable operation
- Antimicrobial housing and buttons for durable hygienic working

Developed for professionals
- Superior touch sensor for integrated mouse function
- Hands-free recording for comfortable working
- Smart, backwards compatible firmware for extra flexibility

IMAGING Solutions

Highlights

Studio-quality microphone

The SpeechMike Premium Air comes with a studio-quality microphone and a built-in tripple layer noise reduction filter for clearest recordings and most accurate speech recognition results.

Free-floating microphone

The free-floating microphone is decoupled from the device's housing, which guarantees that almost no background, touch, click, air or structure-borne noise is recorded.

Integrated motion sensor

Being on the cutting edge of technology, the SpeechMike Premium Air comes with an integrated motion sensor, meaning it can be controlled by the movement of your hand. It detects when it's put on the table, mutes the microphone, and once it is being picked up again it unmutes the microphone. In addition to that, custom events can be programmed, e.g., to pause and to continue the recording.

Patented 100% lossless voice technology

Uncompressed wireless recording enables free movement and pacing whilst working. You can easily move up to 5 meters or 16 feet away from your workstation and your recordings are safely transmitted to your computer in highest quality, without any interruptions. The cutting edge technology ensures every word is captured from the moment you press record.

Superior docking station

The stable and innovative docking station provides wireless charging and easy pairing between your device and the docking station. Users can be flexible and work with various docking stations in different places. With an optional foot control connected, the docking station enables hands-free recording. The AirBridge Wireless Adapter (available as an accessory) is a mobile lightweight alternative to the docking station to connect the microphone to a computer.

Long-lasting battery

The powerful built-in high-speed charging Liion battery ensures up to 24 hours of reliable recording time. The battery can be charged easily and wirelessly in less than three hours using the included docking station.
Freely configurable keys

You can freely configure the buttons on your device or use the pre-installed Secured Dragon Mode. This mode pre-configures the buttons, optimizing them for use with Dragon speech recognition software. It requires no additional driver installation, making setup easy, even in virtual environments.

Wear-free slide switch and push buttons

The SpeechMike Premium Air comes with slide-switch or push-button operation. The slide switch is ergonomically shaped with a softly ribbed surface for smooth tactile feedback and comfortable and intuitive utilization. In addition, our engineers implemented a millionfold proven contactless slider detection, making it completely wearfree for an extra-long lifetime.

Highlights

Polished, antimicrobial housing

The housing of the SpeechMike Premium Air is made of antimicrobial synthetics that work against a wide range of different microorganisms such as bacteria, viruses, fungi or algae. The polished, high quality pearl metal surface also makes the device non-sensitive to touch noises and fingerprints.

Touch sensor

The device comes with a dust and dirt resistant touch sensor for superior quality. This allows the user to easily control and navigate within applications while recording, without having to switch between the mouse and microphone.

Hands-free recording

An optional foot control can be connected directly to the docking station and used for comfortable hands-free recording control.

Highly compatible

Customers can upgrade from their previous SpeechMike model without installing additional software. For integrators, this means no changes need to be implemented and the existing SDK can be used. The SpeechMike Premium Air is compatible with Mac and Windows operating systems, as well as virtual environments such as Citrix, VM Ware and Hyper-V. It can be configured using SpeechControl, the convenient Philips hardware management tool.

Avision Document Scanners

Avision AD340G Document Scanner

A Compact and Affordable Duplex Scanner
The AD340G is 40ppm/80ipm, duplex sheetfed scanners that are fast, reliable, and affordable for business where scanning plastic ID cards, business cards, documents or other heavy card stock is necessary.

Features:
- 40 ppm/80ipm at (A4, Color, 300 dpi)
- Easy to carry due to the slim design
- Support embossed plastic cards
- Ultrasonic multi-feed detection
- Professional bundled software applications include Avision Button Manager , AVScan , PaperPort
- Earth-friendly LED technology
- Compact ADF holds up to 50 pages
- Press and scan to cloud servers such as Google Drive, FTP, Evernote, and Microsoft SharePoint via Button Manager

Avision AD345WN Sheetfed Scanner

The AD345WN is a 60 page-per-minute, duplex scanner that is fast, reliable, and affordable for business where scanning plastic ID cards, business cards, documents or other heavy card stock is necessary. Embedded with Avision-developed image processor, the scanned image can be automatically cropped, straightened, and optimised with enhanced speed.

What is best, with a built-in network port and an additional USB dongle, the product allows you to connect the scanner to a local area network to let other computers or mobile devices access the scanned document.

Features:
- Fast, 60 ppm / 120 ipm scanning in color, grayscale and monochrome (200 dpi, color)
- Fast, 45 ppm / 90 ipm scanning in color, grayscale and monochrome (300 dpi, color)
- Auto crop and deskew a document with the advanced Avision-developed image processing unit to enhance the scanning speed
- Support form paper up to 242 x 356 mm (9.5 x 14 in.)
- Daily duty cycle up to 10,000 sheets
- Robust 100-page automatic document feeder (80 g/m², 20 lb.)
- Reverse roller technology delivers outstanding feeding reliability
- Hard and embossed card scanning up to 1.25 mm in thickness in portrait or landscape feeding
- Press and scan to cloud servers via the bundled software Button Manager V2
- Earth-friendly LED technology
- Long page scanning: 3000 mm (118") (<300 dpi, simplex) / 6000 mm (236") (<200 dpi)

Fujitsu Document Scanners

Fujitsu - FAFI-8040

The fi-8040 offers new options to meet real-world productivity with "DirectScan" function with PC-less network compatibility. It enables PC-less scans and attaches the scans to emails directly. Despite being compact, the scanner achieves scan speeds of 40 ppm/80 ipm (200/300 dpi, color, A4 portrait), loads up to 50 sheets at a time, and comes equipped with a capability of scanning up to as many as 6,000 sheets a day.

Features:
- Comes with "DirectScan" function to enable PC-less scans and attaches the scans to emails directly
- User-friendly 4.3-inch touch screen to achieve better user experience
- Scan a wide variety of documents with just a switch to the Manual Feed Mode
- Supports both LAN and USB 3.2 connectivity
- Optimized high-quality image data with "PFU Clear Image Capture"
- Linking scanned data to business software applications and cloud services with PaperStream NX Manager
- Scanner Central Admin Desktop that enables setting DirectScan function to multiple scanners
- PaperStream IP and PaperStream Capture providing advanced image processing functions, with PaperStream Capture Pro software as a premium option
- PaperStream ClickScan for ad-hoc use

Fujitsu - FAFI-8170

The FI-8170 offers an innovative and superior scanning experience. Compact and reliable, the scanner achieves scan speeds of 70 ppm/140 ipm (200/300 dpi, color, A4 portrait), loads up to 100 sheets at a time, and comes equipped with a capability of scanning up to as many as 10,000 sheets a day.

Features:
- Scans big volumes with "Automatic Separation Control"
- "Paper Protection" function using Image Monitoring technology and sound technology
- Optimized high-quality image data with "PFU Clear Image Capture"
- Scans variety of documents including passports and booklets
- Color LCD Panel for easy operation
- PaperStream IP and PaperStream Capture providing advanced image processing functions, with PaperStream Capture Pro software as a premium option
- PaperStream ClickScan for ad-hoc use

Barcode Scanners

Honeywell Voyager 1250g

Honeywell's Voyager 1250g single-line laser scanner provides a superior out-of-box experience and aggressive reading of linear bar codes, including those up to 23 inches away. For users that require hands-free scanning, the easy-to-assemble Voyager 1250g stand increases throughput by incorporating automatic in-stand detection.

Ease of use: Simplify set up with quick and easy stand assembly; ergonomic design reduces user fatigue in scan-intensive applications.

Increases throughput: Extended depth of field makes an easy task of scanning out-of-reach items; provides true object detection and automatic in-stand detection and configuration.

Remote MasterMind: Lowers total cost of ownership by up to 60% by reducing technician travel time and expenses; scanner updates and diagnostics are able to be performed by one person in a single location.

Zebra Black Standard Range 1D/2D Cordless Bluetooth Handheld Barcode Scanner Kit

2D barcodes have made their way to your Point of Sale (POS), appearing on everything from the items your customers are purchasing to printed and electronic coupons and loyalty cards. Your 1D scanner can't capture the new 2D codes, leading to exceptions that slow down the check-out process and frustrate customers at that key last personal touchpoint in your store. But with the DS2200 Series, you can scan it all. You get an affordable 1D/2D imager that doesn't compromise performance or features for price. And you can choose the model that best fits your POS needs — the corded DS2208 or the cordless DS2278.

In addition to providing best-in-class scanning functionality, the DS2200 Series is easy to deploy, easy to use and easy to manage. The DS2200 Series is pre-configured and ready to use right out of the box. Workers get best-in-class first-time, every-time scanning with true point-and-shoot simplicity. When it comes to management, our no-cost tools make it easy to manage scanners in all your locations and develop a custom scanning application to best meet your specific business needs. The DS2200 Series — delivering the affordability your budget demands, with the deployment, ease of use and management simplicity your business requires.
